

ALMOHANAD MEDICAL EST. BETTER QUALITY FOR GOOD LIFE

Introduction

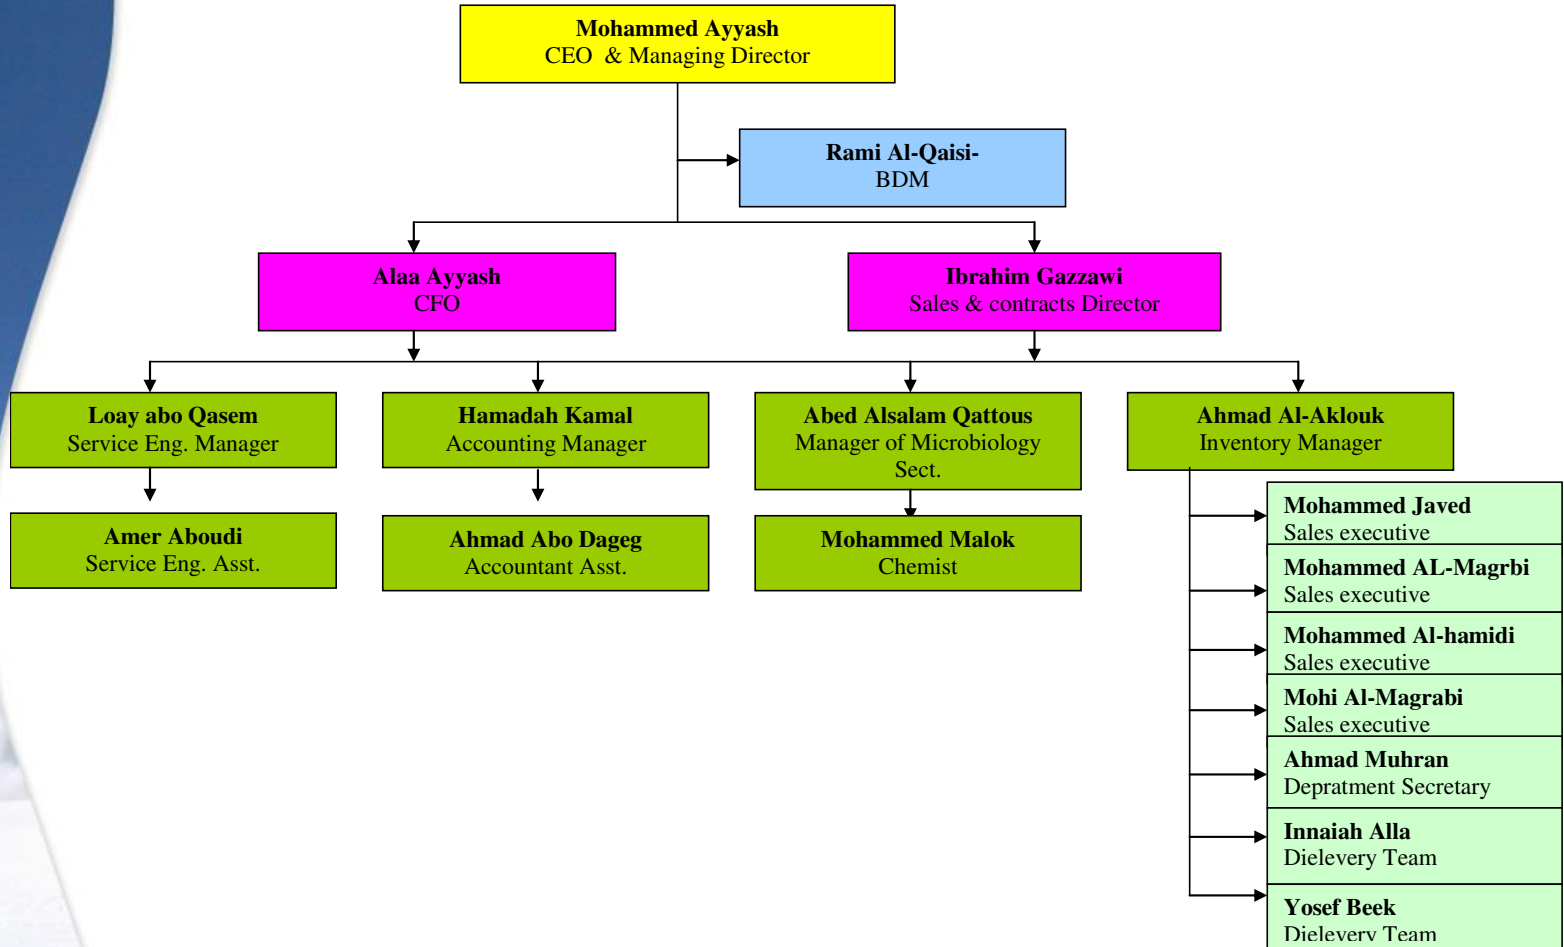

Company History

Since 1999, Where MM has started business operation, until today we have always strived to position as premium supplier of medicals instruments in Middle East and other markets.

What our company does?

Serving the health community specially lab supply & health care products.

ALMOHANAD Organizational Structure

Mission & Strategy

Vision Statement

The vision of ALMOHANAD Medical is to provide distinctive high quality medical products to the entire customer base and to remain as trusted brand in Middle East.

Mission Statement

The mission of Al ALMOHANAD Medical is to lead the local and global medical market and creating better quality for good life.

Our Values

- Making and maintaining long lasting relationship with our clients and vendors throughout the world
- By delivering quality services on time to the clients
- Offering innovative medical solution
- Adapt seamlessly to customer needs and requirements

What Makes Us Different From Others

- Skilled application professionals.
- Establishment work execution & delivery process.
- Quick turnaround time.
- Satisfied clients globally
- Consistent growth & performance.
- Proximity to skilled manpower source

Companies we represent in Kingdom of Saudi Arabia

- Thermo Fisher - Trek Diagnostic Systems - USA
- Biolabo SA – France
- Charles River - France
- Cormay Group – Poland
- Dynex – USA
- CTK - USA
- Diamond – USA
- Biolog – USA
- Monoboind - USA
- Bioanalyse – Turkey
- Radim – Italy
- Eurospital - Italy
- Biobase – China
- Intec – China
- Getein - China
- Analyticon – Germany
- LG Life Sciences – Korea
- Ani Biotech - Finland

Areas of expertise

- Chemistry analysers
- Chemistry Kits
- Haematology Analysers
- Micro plate Analysers
- Electrolyte Analysers
- Sensitivity discs
- Lab disposables
- Biological Safety cabinet
- Gastroenterology
- Blood culture (Microbiology)
- Microbial identification
- PCR

CORMAY GROUP

Is a manufacturer of high quality diagnostic reagents and the highest quality laboratory equipment.

For more than 25 years, we have been also designing, manufacturing and distributing a broader range of products for clinical chemistry, hematology, electrophoresis, coagulation and specific proteins.

CORMAY GROUP

ORPHEE - MYTHIC 18 Hematology Analyzer

CORMAY GROUP

ORPHEE - MYTHIC 22 AL Hematology Analyzer

BIOBASE

BIOBASE is an professional manufacture of laboratory products from 1999. Our main products are Biological Safety Cabinet(Class I/II/III),Laminar Flow Clean Bench, Fume hood, Biochemistry Analyzer, Refrigerator and Incubator.

BIOBASE

BIOLOGICAL SAFETY CABINET - 11231BBC86

BIOBASE

BIOLABO

French manufacturer of Reagents for Medical Biology & Chemistry Machine In the early 90's, the production-line was completely reorganized to offer a full range of Reagents compatible with most Open Analyzers.

BIOLABO

Automatic Analyzer KENZA 240 TX / ISE

BIOLABO

KENZA MAX Biochemistry Analyzer

BIOLOG

World leaders in cell phenotyping technology with bacterial, fungal, and animal cells for major applications including:

- Microbial species identification
- Cell fingerprinting, analysis, and quality control
- Analyzing effects of genetic changes on cells
- Analyzing effects of chemicals on cells
- Optimizing culture conditions of cells in research, bioprocess development, and stem cell studies

BIOLOG

Omni Log Bacteria, Yeast and Fungi Identifications

BIOANALYSE

Bioanalyse was founded in 1983 and began its standard Manuel manufacturing process based on published scientific literature

BIOANALYSE

ANTIMICROBIAL SUSCEPTIBILITY TESTING SYSTEM

TREK DIAGNOSTIC SYSTEMS (thermo fisher)

TREK Diagnostic Systems is a dedicated microbiology company offering blood culture, identification, and susceptibility technologies to provide cost effective improvements in workflow efficiencies, ergonomics, and test result performance, resulting in better solutions for patient care.

TREK DIAGNOSTIC SYSTEMS (thermo fisher)

Thermo Scientific – TREK Diagnostic System

INTEC

Intec PRODUCTS, INC., solely owned by the US ITH Group, was established in 1989. Intec PRODUCTS, INC. is a biotech company that specializing in research & development, manufacturing and distribution of the medical diagnostic products. Thanks to the supports from our valued customers worldwide. Intec PRODUCTS has become one of the most successful diagnostic companies in the world. In order to strengthen the business resources and global business management, the US TTH Group has merged its US and China diagnostic reagent operations.

INTEC

INTEC PRODUCTS

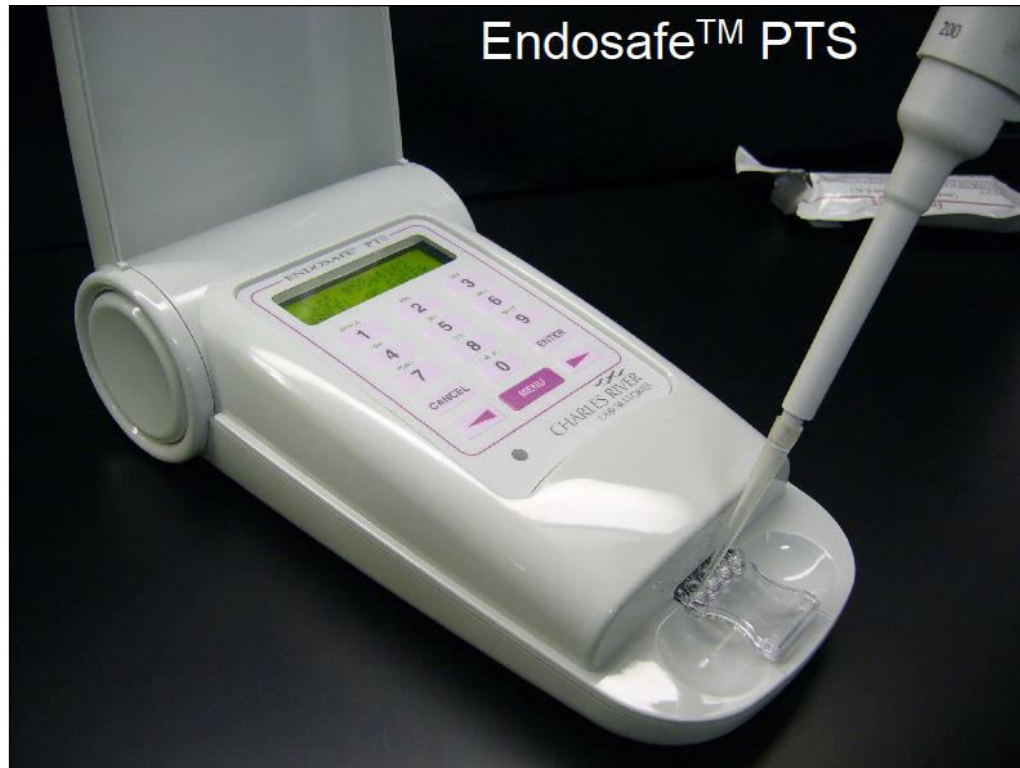

CHARLES RIVER

For more than 60 years, Charles River has been helping our global partners accelerate drug discovery and development by providing them with high-quality research models and preclinical and clinical support services. Our offerings span the entire drug development process, from discovery through market approval, providing our clients a partnership throughout.seamless

CHARLES RIVER

Endosafe PTS

DIAMOND DIAGNOSTIC

Diamond brand is analyzers including [SMARTLYTE](#), [CARELYTE](#), and [PROLYTE](#) have been made available to meet a variety of customer and market demands.

SMARTLYTE, designed for lab dealers crossing over to meet the needs of the VET market, is our signature product providing the option to test for electrolytes in either Human or VET modes.

CARELYTE meets the needs of Vet Lab's worldwide while our first electrolyte analyzer, the PROLYTE, is our lowest priced unit testing only for Na,K,Cl human patient samples.

DIAMOND

DIAGNOSTICS

DYNEX

Dynex Technologies, Inc. has a long and distinguished track record of bringing breakthrough products to market. Founded as Cooke Engineering in 1952, renamed Dynatech Laboratories in 1968, and ultimately Dynex Technologies in 1996 – the company has been a leading innovator in microplate analysis. In the 1960s, Dynex introduced the first disposable Microtiter® plate and system, developing disposable pipettes, plate sealers, and inoculators

DYNEX

DSX & DS2

Analyticon

Analyticon is an agile, global diagnostic corporation dedicated to offer customized products in four main business lines: urinalysis, clinical chemistry, hematology and coagulation. Our products provide healthcare professionals with accurate and affordable diagnostic solutions in physician's offices, hospitals and clinical laboratories.

We distribute our products all over the world in Europe, Middle East, Africa, Asia-Pacific and Americas by channeling through distributor organizations, currently in nearly 100 countries. In our fast growing organisation we are working in multi-national teams at the headquarters and around the world in close personal contact with all customers. immunodiagnostic kits.

Analyticon

Urine Diagnostics

SEAC RADIM

Radim is an Italian manufacturer of fully integrated in-vitro immuno-diagnostic systems, operating in the domestic and international market for almost thirty years.

The Company is made up of 230 people working into two main facilities: Radim, located in the industrial area of south Rome, whose core activity is research development and production of immunodiagnosics kits; Seac, located near Florence, is focused on research, design and production of automated instruments for Laboratory tests.

SEAC RADIM

ALISEI

Getein Biotechnology

Getein Biotechnology Co.,Ltd., a new type of joint venture, was founded in March 2002. It is located in Zhongshan Science and Technology Park, with a total construction of 17,000 square meters. We are a manufacturer specializing in protein and medical equipments. Our products are focusing on cardiovascular and cerebrovascular diseases, infectious disease, oncosis, kidney trouble and other diseases area. Currently, Getein has more than 20 national patents, and has awarded the Rhine TUV ISO13485 certification and CE authentication.
